

VIJAY A

Full Stack Developer | Software Engineer

+91 88387 25310 · vijay2304a@gmail.com · Chennai, India · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Software Developer with 1+ year of production experience building and operating custom internal applications, automation pipelines, and API integration services using React, Next.js, Node.js, and Supabase. Shipped three live platforms with measurable performance gains. Experienced in Agile/Scrum delivery, CI/CD pipelines, TypeScript, and stakeholder-facing communication. Microsoft Azure AI Fundamentals certified.

EXPERIENCE

Software Engineer – Intern | Propzping

Jan 2025 – Present · Full-Time · Remote · Next.js · TypeScript · Supabase · Cloudinary · Vercel · GitHub Actions

- Developed and maintained an AI-powered real estate platform end-to-end, reducing property search time by 40% through intelligent filtering and automation.
- Architected scalable frontend using Next.js (SSR + ISR) with TypeScript, improving Lighthouse performance score by 30% and cutting time-to-interactive measurably.
- Built and operated backend services on Supabase — auth, storage, real-time queries — reducing development overhead by 30% while maintaining high reliability.
- Integrated Cloudinary as a media delivery service, cutting image load time by 50% via CDN optimisation.
- Diagnosed and resolved 10+ complex UI responsiveness defects across Agile sprint cycles, improving mobile compatibility by 75%.

Software Engineer – Freelancer | Zionarch Architects

2024 · Chennai, India · Next.js · TypeScript · Supabase · SendGrid · Vercel · [zionarch.com](#)

- Designed, built, and deployed a production-ready business website end-to-end; site serves live client traffic with zero downtime post-launch.
- Integrated SendGrid SMTP for automated client inquiry handling, eliminating manual email routing and reducing response lag.
- Implemented Supabase Storage for image asset management, enabling fast content delivery without a third-party CMS.
- Delivered a fully responsive, accessible UI using Agile delivery practices — directly improving the client's digital presence and inquiry conversion rate.

PROJECTS

HOPON — Ride Sharing Platform

React · TypeScript · Node.js · Express.js · MongoDB · Redux · JWT · REST API · [Live Demo](#) · [GitHub](#)

- Engineered a full-stack platform supporting complete rider-to-passenger booking workflows; onboarded 50+ test users during beta.
- Implemented Redux for centralised state management across multi-role flows, eliminating race conditions and cutting state-related bugs by ~60%.
- Integrated JWT authentication and real-time notifications, ensuring secure session handling and sub-200ms auth response times.
- Automated the full ride lifecycle (request → match → complete → receipt), reducing manual drop-off points to zero.

SNAP SYNC — Facial Recognition Gallery

React · Node.js · MongoDB · Firebase · Face-API.js · REST API · [GitHub](#)

- Built MERN-stack platform with facial recognition achieving 70%+ accuracy for automated photo tagging across 1,000+ test images.
- Integrated Firebase Cloud Storage for scalable image management, handling large-scale uploads without performance degradation.
- Optimised REST API response times for high-volume media queries, maintaining sub-300ms latency under concurrent load.

KNOW MY NATION — Interactive India Dashboard

HTML · CSS · JavaScript · REST APIs · [Live](#)

- Built an interactive reporting dashboard integrating live Weather and News APIs as real-time operational data services.
- Implemented dark/light mode and fully responsive layout with zero external CSS frameworks, achieving 95+ Lighthouse accessibility score.

TECHNICAL SKILLS

Frontend

JavaScript (ES6+), TypeScript, React, Next.js, TailwindCSS, Material UI, Redux, HTML5, CSS3

Backend & APIs

Node.js, Express.js, REST APIs, MongoDB, SQL, Supabase

Cloud & DevOps	Docker, GitHub Actions, Vercel, CI/CD
Testing & Tools	Postman, Git, Figma, Cursor, GitHub Copilot
Methodologies	Agile, Scrum, OOP, System Design, Full Stack Architecture, Data Structures & Algorithms

EDUCATION

B.Tech Information Technology | Sri Eshwar College of Engineering

2022 – 2026 · CGPA: 8.42 / 10 · Relevant Coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Software Engineering

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Azure AI Fundamentals — Microsoft (2024)
- Data Structures & Algorithms in C — Udemey (2023)
- LeetCode: Rating 1625 (Top 40%), 150+ problems solved across 15+ contests — [Profile](#)
- Hack Elite '23: 3rd place in 24-hour national hackathon — shipped a working product under pressure.
- SSOC 2024: Open source contributor — Social Summer of Code.
